**NEW FAIR,

For the Sale of Sheep and Lambs, of the genuine South Down breed only, on Brighthemston Level.

THE rapid strides which AGRICULTURE has made within the last ten years, in this country, and the extreme utility which has been the result of its present scientific mode of practice, has commanded the attention and aminization, not only of all England, but or all evidined Europe. To those who are interested in the purchase of any particular breed of stock, it must be of extreme importance, that their stock be generally.

MINATED.

To fix, therefore, a spot where a pure and unmixed To fix, therefore, a spot where a pure and unmixed breed, shall always be produce; and where the purchaser (who comes perhaps from a distance) shall be sure of undirected stock, appears to be a great desideratum. In no instance is it more so, than in that useful and highly productive animal, the SOUTH DOWN SHEEP. Those who possess this breed, true and genaine, have had much reason to laument, that at fairs, where a great variety of slicep are brought to market, many are sold for South Down sheep, which have no pretentions to be called; and which atterwards not answering the purpose of the largest control of the production of the produ ano, and Wether Lambs; and moreover we will not, owingly, either ourselves introduce, or suffer to be induced, to this fair, any but what shall be of the GENUINE, I RUE SOUTH DOWN DOWN DOWN TO THE TOWN TO THE T

Affairs."

"July, 1807.—1st Department."

The following letter is given in a Morning Paper of Texeday.

"Paris, August 2. Author O'Connor, after flattering himself in vain with obtaining the noble hand of the daughter of an Innikeeper at Ajaccio, in Consistent, a register of the Manghard of the daughter of the Manghard of the Mangha

plays both the active surgues of the French Coverment, and the dangerous ambition of its Chief."

SCOTLAND.

Edinburgh, Aug. 13. No event has occurred for many years in Edinburgh, which more deeply interests the inhabitants at the time, than the murder rests the inhabitants at the time, than the murder of the British Linen Company's Bank in November 1 and robbery of the unfortunate Begbie, the porter of the British Linen Company's Bank in November 1 and the property of the British Linen Company's Bank in November the Covery of the dead body, and the escape of the murderer, through a street crowded with people, before it was dark; form altogether a combination of circumstances unprecedented.

Nine months have now elapsed since the crime was committed; after the strictest search, no clue was committed; no committed the strictest search of the strictest search, no clue and the strictest search of the strictest search

cel, containing a quantity of bank-notes, which, on examination, proved to be those which Begbie was robbed.

readmantly, proceed to the time which Begode was robbed. The persons who found the notes carried them to The Sheriff's Office, where an investigation is going on. They appear to be large notes only, but, from the damage namy of them have sustained by the long exposure, the exact sum is not yet ascertained; it is said to be above 3000/c. The sum of which Begolie was robbed was \$700/c. in 20, 10, 5 pound notes; 230 guinea notes, and 440 one pound notes; the small notes, it is said, are not in the parcel.

THE WEST-INDIA COLONIES. The Committee appointed to enquire into the commercial state of the West-India Colonies have laid their report before the House of Commons, and the description it gives of the state of the West-India Planters is ruly alarming. Their distresses, it appears, principally arise from the very uniformently the British merchant enjoyed nearly a monopoly, but now he cannot even enter into competition with the Planters, not only of the neutral, but of the hostile Colonies. We wish a remedy for this evil was as obvious as the causes which have produced it; but the relaxations which have brown time to time taken place in our Maritime System, in frourglof Neutrals, have given them advantages which we shall find it difficult, if not impossible, to recover. Perhaps, indeed, the hostile confiderancies, which Bonaparte threatens to form against us, may, in one point of view, be beneficial to our interests, by enabling us again to revert to that Maritime System upon which and all our commercial greatness was founded, and without which it cannot long exist. We are happy to find that the Committee, in the course of their investigation, turned their attention to a subject which is of the highest importance, viz. the possibility of the British North American Colonies affording those supplies to our West-India Islands which are now drawn from the United States. Upon this point, some very interesting evidence was given before the Committee, in the course of their investigation, turned their acquainty of that supply might be encreased to any extent. The supply, however, of hour would be small, and of inferior quality. Upon the whoef, casy the Report the impression which your Committee have received is, that the trade, now the continue to the course of their situation in those respects, which and devantageous to the inhabitants of our Colonies, and one which they could not relinquish without essential of trimert, unless it were compensated by other advantages; but that is not expected in the present statement. Your Committee have prese

SUSSEX AGRICULTURAL MERTINO.

Lenet, Aug. 17. The annual show of Prize Cattle near this town, last Wednesday, was not so numerously attended as usual, in consequence of its being the Prince of Wale's birth-day, and of the grand review of all the trops in the dividence of the grand review of all the trops in the 19th Highnest. Judges were appointed as usual to the Highest. Judges were appointed as usual to the Highest and the several heads of cattle. The company at dinner at the Star Inn, filled three many and many could not find places. The tables were we want to the several heads of cattle. The company at dinner at the Star Inn, filled three many and many could not find places. The tables were we may be supplied with venizon, owing to the liberatily of the Earl of Egermont and Sir C. M. Surrell, Bart, the Earl of Egermont and Sir C. M. Surrell, Bart, the Earl of Egermont the Lart of the Earl of the Earl of Egermont that the chair in the absence of the Earl of Egermont, (who was detained in London, by business in Parliament) and declared the prixy business in Parliament and declared the prixy business of Parliament and declared the prixy business of Parliament and the latter of the bast Bull, two years old, bred by himself.

The Piece of Plate for the best Heifer, three years old, &c. was not awarded. The Judges not considering the animal shewn to possess sufficient merit to entitle the owner to the prize.

Messes, J. and E. Scraes, of Ringmer, the Piece of Plate, for the best Cogher of Plate, for the prize of Plate, for the best Cogher of Plate, for the prize of Plate, for the best South Down Ram, two years old.

Mr. J. Farncombe, of Stoneham, two

It is remarked by the friends to this annual institution, that many who have extraordinary good stock, neglect to send them to the shew; and that although there were some very fine cattle, especially sheep, yet there were many of so inferior a kind, as not to be worthy of admission to the shew; steep discraced the breed of the country, which was not to be worthy of admission to the shew; steep discraced the breed of the country, which was very unfavourable impression to many respectable strangers who attended from distant countries.

A Pair was established on the 5th inst. at Bath, for the fine sorts of British Wool, at which Sir John Cox Ilippesley, Bart, presided; but in consequence of the circumstances of the times, little or no business was done. Dr. Parry demanded 3s. 6d. per lb, for his Merino fleeces, which (if they were not washed before shearing, which is supposed to have been the case), may be considered as equal to 6s, per lb. if the same had been scoured and sorted, as the Spanish Wool is delivered in this country; and the Spanish Wool is delivered in this country; and the spanish Wool is delivered in this country; and the properties of Ryeland and Merino; 2s. 10d. was demanded.

It his hoped that this excellent encouragement.

demanded.

It his hoped that this excellent encouragement, will promote the growth of fine wool in this Island.
